

HEATING AND COOLING DISCOUNTS ELIGIBILITY CATALOG

ENERGY-EFFICIENT FAN (furnace blower motor or ECM)*

ECM in an existing furnace or air-handler discount - **\$100**

**Electronically commutated motor*

ELIGIBILITY

- The existing furnace or air-handler system must be used as the primary heating and/or cooling source for the home's living space.
- Discounts is available for a new ECM in an existing furnace.

INSTALLATION REQUIREMENTS

- When installing an ECM in an existing furnace or air-handler system:
 - The new ECM must replace an inefficient (non-ECM or permanent split capacitor, PSC) fan.
 - The existing furnace must have an AFUE of 64.4 percent or more.
 - Constant torque models applicable.
- System must be installed by a Service Provider conforming to all applicable building, local and state codes, and manufacturer specifications.
- The existing furnace or air-handler must be installed in a single-family home (detached or attached, which includes condos, duplexes and townhomes) or multi-family property with each unit on a ComEd residential rate class.

SMART THERMOSTAT

ENERGY STAR® certified smart thermostat rebate - **\$100**

ELIGIBILITY

- The rebate is limited to ENERGY STAR certified smart thermostats. Confirm eligibility at energystar.gov/productfinder/product/certified-connected-thermostats/results
- Each ComEd residential delivery service customer is limited to one smart thermostat rebate per household.
- Rebate paid will not exceed the smart thermostat purchase price, excluding taxes, shipping and installation charges.
- The rebate is available for a new smart thermostat installed in an existing home or a new addition. A smart thermostat installed during construction of a new home does qualify for a rebate.

INSTALLATION REQUIREMENTS

- Smart thermostat must be installed on one of the following systems:
 - Central air conditioner and furnace
 - Electric resistance heating (with or without a central air conditioner)
 - Electric heat pump
- Smart thermostat must be fully installed, operational and connected to the internet via Wi-Fi prior to submitting a rebate application.
- Smart thermostat must be purchased new. Resale thermostats, new parts installed in an existing smart thermostat, or a smart thermostat that is leased, rebuilt, rented, received from insurance claims, received from a warranty, received with reward points or won as a prize, do not qualify.
- Smart thermostat must be installed conforming to all applicable building, local and state codes, manufacturer specifications and requirements listed throughout this catalog and in the program terms and conditions section of this catalog.
- Smart thermostat must be installed in a single-family home (detached or attached, which includes condos, duplexes and townhomes), or a multi-family property with each unit on a ComEd residential rate class.
- Smart thermostat must be installed with a continuous and dedicated 24-volt power source supply. The new smart thermostat may not be installed using power-cycling of the heating and cooling system for this power. Customers and Service Providers are required to use the “common” wire (also known as a C-wire or fifth wire) either directly or via a 4-to-5-wire converter, for this power source. Two-wire systems may require an additional adapter to provide the required power source to the smart thermostat.

AIR CONDITIONER AND AIR SOURCE HEAT PUMP TUNE-UPS

Air conditioner tune-up discount - **\$25**
Air source heat pump tune-up discount - **\$50**

ELIGIBILITY

- One discount per household per calendar year.
- Existing equipment must be three years of age or older.
 - Equipment is only eligible for a tune-up once every three years.
- Tune-up may not be part of an existing pre-paid maintenance agreement.

INSTALLATION REQUIREMENTS

- Tune-up must be performed by a Service Provider conforming to all applicable building, local and state codes.
- Service Provider is required to provide a paid invoice confirming that a clean and check was completed, along with the serial number of the exterior condenser unit. The clean and check must include:
 - Check refrigerant charge
 - Clean the condenser
- Tune-up must be performed on equipment located in a single-family home or multi-family building with each unit on a ComEd residential rate class.

*Air source heat pump tune-ups may require additional application information.

HEATING AND COOLING DISCOUNTS

ELIGIBILITY CATALOG

DUCT SEALING

Duct sealing discount - \$200

ELIGIBILITY

- A system tune-up will need to be performed by a Service Provider to ensure that the system is running within manufacturer specifications.
- New construction is not eligible.

INSTALLATION REQUIREMENTS

- Service needs to be performed on a system where 50 percent of the duct work is located in unconditioned space (attic, vented crawlspace or exterior walls) or 70 percent located in semi-conditioned space (unfinished basement).
- Service needs to be performed in a single-family home or multi-family building where each unit pays the residential ComEd rate.
- Service needs to be performed by a Service Provider conforming to all applicable building, local and state codes, and manufacturer specifications.
- Service Provider must be able to supply pre- and post-duct leakage measurements given at 25pa, using one of three methods:
 - Total duct leakage to the outside
 - Modified blower door subtraction testing, using the subtraction correction chart
 - A mechanical duct sealing system that can generate a report showing the pre- and post-CFM readings at 25pa.
 - All three methods will be subject to the same quality-control process.

HEATING AND COOLING DISCOUNTS

ELIGIBILITY CATALOG

CENTRAL AIR CONDITIONER

- ≥ 18 SEER central air conditioner – **\$225**
- ≥ 16 SEER central air conditioner – **\$150**
- ≥ 15 SEER central air conditioner – **\$100**

ELIGIBILITY

- The central air conditioner must have a Seasonal Energy Efficiency Ratio (SEER) rating of 15 or greater to qualify for a discount. The SEER rating from the AHRI certificate will be used to calculate the discount amount (SEER ratings cannot be rounded up). If the AHRI certificate validates the system at a SEER less than the minimum requirement, your system is not eligible for a discount.
- The indoor (evaporator coil) and outdoor (condenser) combination, in addition to the furnace, must be AHRI certified, validating that the system meets the minimum SEER requirements above. The AHRI certified reference number must be entered in the discount application.
- Rooftop and packaged units do not qualify for a discount.
- Discount is available for a new system installed in an existing home, new addition or new construction.

INSTALLATION REQUIREMENTS

- System must be installed in a single-family home (detached or attached, which includes condos, duplexes and townhomes) or a multi-family property with all units on a ComEd residential rate class.

AIR SOURCE HEAT PUMP

- ≥ 18 SEER air source heat pump – **Ask your distributor for discount details**
- ≥ 16 SEER air source heat pump – **Ask your distributor for discount details**

ELIGIBILITY

- The indoor (evaporator coil) and outdoor (condenser) combination, in addition to the furnace, must be AHRI certified validating that the system meets the minimum SEER requirements above. The AHRI certified reference number must be entered in the discount application.
- The SEER of the qualifying product including the furnace must meet the minimum efficiency requirements. If the indoor unit, outdoor unit and furnace are not rated together by AHRI, you will need to verify the overall rating of the new system.
- Discount is available for a new system installed in an existing home, new addition or new construction.

INSTALLATION REQUIREMENTS

- Installations must meet the minimum efficiency requirements as shown above to qualify for a discount. The SEER rating from the AHRI certificate will be used to calculate the discount amount (SEER ratings cannot be rounded up). If the AHRI certificate validates the system at a SEER less than the minimum requirement, your system is not eligible for a discount.
- System must be installed in a single-family home (detached or attached, which includes condos, duplexes and townhomes) or a multi-family property with each unit on a ComEd residential rate class.

HEATING AND COOLING DISCOUNTS

ELIGIBILITY CATALOG

DUCTLESS MINI-SPLIT HEAT PUMP

≥ 17 SEER and 9.5 HSPF ductless mini-split heat pump -
Ask your distributor for discount details

ELIGIBILITY

- Discount is available for a new system installed in an existing home, new addition or new construction.
- The indoor and outdoor combination must be AHRI certified validating that the system meets the minimum SEER requirements above.
- The discount amount is determined by the SEER rating and HSPF as listed in the rebate application. The discount amount is for the complete system, including both the indoor and outdoor units. The actual SEER and HSPF from the AHRI certificate will be used to calculate the discount amount (SEER and HSPF ratings cannot be rounded up).

INSTALLATION REQUIREMENTS

- Installations must meet the minimum efficiency requirements as shown above to qualify for a discount.
- The ductless mini-split heat pump (“system”) must have a SEER rating of 17 or greater and a Heating Seasonal Performance Factor (HSPF) of 9.5 to qualify for a discount, which requires an AHRI certification of the outdoor unit (condenser) and indoor unit (evaporator coil). If the AHRI certificate validates the system at a SEER less than the minimum requirement, your system is not eligible for a discount.
- System must be installed in a single-family home (detached or attached, which includes condos, duplexes and townhomes) or multi-family property with each unit on a ComEd residential rate class. Each residential home or unit must have a dedicated heating and cooling system (central heating and/or cooling for multiple units in a multi-family property do not qualify).
