## Is Your Heating and A/C System Getting Quality Care?

Ensure your comfort and protect your investment with rebates for advanced heating and A/C maintenance

AC Quality Care 

## Are You Comfortable?

An inefficient heating and A/C system can have a big impact on your energy bills—and an even bigger impact on your comfort. But with Quality Maintenance, you can count on reliable comfort, manageable costs and longer equipment life.

## Not Your Typical Tune Up

Quality Maintenance goes beyond any heating and A/C service you've experienced. Certified contractors follow a stringent, national standard to assess and repair your system. Just like with your car, regular heating and A/C maintenance can minimize costly repairs down the road.

Quality Maintenance begins with a no cost System Assessment & Improvement (\$300 value) so you get the complete picture: from equipment safety, to performance, to necessary repairs or upgrades. Additionally, several energy efficiency improvements are made, including efficient fan control installation, condenser coil cleaning and an air filter change.

## Better Performance at a Lower Price

SDG&E® customers can qualify for rebates to lower the service cost of your heating and A/C system. Additional rebates are available for advanced improvements, as well as a one-year Quality Maintenance service agreement.

You'll get the complete benefits: increased comfort, decreased energy costs and longer equipment life.

## It's as Easy as 1,2,3

- 1 Call us to schedule a no cost System Assessment & Improvement (\$300 value) with a qualified contractor
- 2 Complete repairs or upgrades to improve system performance and increase efficiency - additional rebates available
- 3 Enjoy increased comfort and significant energy savings

## Quality Standards

We stand by our work, and we're not alone. AC Quality Care is a program administered by DNV KEMA Services, Inc., through a contract awarded by SDG&E. AC Quality Care staff screen and qualify residential contractors in the area. We follow industry best practices for maintenance and installation and perform random inspections on completed projects to ensure quality work.

### Q: How do I know if I need this service?

A: If your heating and A/C system is more than one year old, you can benefit from this service.

### Q: Why should I schedule a System Assessment & Improvement?

A: It provides a baseline of your heating and A/C system performance and includes efficiency improvements. It's a no cost start on the road to optimizing the energy efficiency of your system. Your contractor will also provide a detailed report identifying any necessary repairs.

### Q: What rebates are available?

- A: **\$300 System Assessment & Improvement**
- Inventory & Assessment
  - Efficient Fan Control Installation
  - Condenser Coil Cleaning & Air Filter Change
- \$350 Airflow Correction**  
**\$220 Energy-Efficient Blower Motor Retrofit**  
**\$50 Refrigeration System Service**  
**\$50 One Year Maintenance Agreement**

### Q: Why do I need a One Year Maintenance Agreement?

A: To ensure your system continues to operate safely, efficiently and reliably all year long.
