

Past Project Bounty

20% bonus for electric projects

We would like to thank our DNV Trade Allies for their continued support and participation in the Energy Efficiency Program for Business. We realize that during these challenging times, you may continue with energy efficiency improvement projects but not have the resources to complete our incentive application. To encourage your continued participation in the program, we are offering an extended review period for past projects and a bonus to Trade Allies for any eligible projects that may have previously been completed but did not receive incentives. These projects may extend beyond the typical 60 day maximum from project completion to submission of final application.

This Past Project Bounty will provide an additional 20% bonus, paid directly to the DNV Trade Ally. All applications submitted between August 1, 2022 and November 30, 2022 are eligible, regardless of the actual project completion date. Qualifying projects will be paid at current incentive levels. Only electric measures will apply. Our team is standing by, ready to help with the application process and get you paid as quickly as possible.

Applications must be submitted via the Online Application. To apply for this offer, go to the Finalize Tab in the Online Application. Near the bottom of the page in the Notes for DTE Energy Staff text box, type in “Past Project Bounty” before submitting your application. This bonus will be calculated manually during review.

Incentives are calculated from the paid base incentive total, which does not include eligible bonuses. Funds are limited and subject to change. This offer may end at any time.
