

Energy Efficiency Program for Business

Working hard to make your job easier.

Fast track your boiler tune-up application and receive a trade ally bonus!

The DTE Energy Efficiency Program for Business team understands that boiler tune-up applications can be tedious. As a result, we have a quick application process designed to fast track your tune-up application and require only minimal information.

This process will only be available to qualified designated trade allies. As an added bonus we are offering \$20 per tune-up for space heating (measures HG-21 through HG-23), domestic hot water (HG-28) and \$200 for process boilers (measures HG-24 through HG-27). Bonuses will be paid directly to the trade ally for every tune-up applied for with this new process submitted from Feb. 1, 2020 through Nov. 30, 2020.

This bonus may be combined with other DTE Energy Efficiency Program for Business bonuses. However, incentives are calculated from the paid base incentive total, which does not include eligible bonuses. Funds are limited and subject to change. This offer may end at any time.

How quick application works

Designated trade allies must use the provided excel spreadsheet to complete the entire paperless application process. Follow this simple process:

1. Review the incentive amount with your customer, which will be paid directly to the customer (unless a third-party agreement is signed by the customer to pay to the trade ally).
2. Complete a simple excel spreadsheet (available from your outreach representative). Send us the spreadsheet and attach the combustion analysis weekly or monthly.
3. Get paid in 2-3 weeks.

Multiple locations can be submitted on the same spreadsheet.
