

Energy Efficiency Program for Business

LEED design review incentive

To encourage LEED design/certification for new energy-efficient buildings, a \$1,500 incentive for LEED design review assistance is available for electric, gas, or a combination. A combination customer is eligible to receive \$1,500 for each fuel type. This incentive is to be paid to the firm or organization upon design modeling completion. Construction does not need to be completed in order to apply for this incentive. This design review assistance corresponds directly to the LEED rating systems. The whole building energy simulation is tied directly to the energy and atmosphere prerequisite 2 – minimum energy performance prerequisite (Option 1).

The DTE Energy Efficiency Program for Business strongly recommends sharing the progress of your LEED application to keep the entire program team updated. Please contact our outreach team for project assistance.

For more information about this offer, contact our office by phone at 866.796.0512 (option 3) or by email at dtesaveenergy@dnv.com.
