

Non-DLC category product approval form

Use this form if your project includes non-DLC lighting that meets our evaluation criteria

Effective Dec. 1, 2017, lighting not listed by the DesignLights Consortium® (DLC) no longer qualifies for prescriptive and custom applications. However, such lighting may be approved for incentives if it meets two criteria:

1. The product does not fall into a category listed on the DLC website
2. The program Team determines that the product meets DLC performance criteria.

To receive DLC incentives, applicants must:

1. Ensure the equipment is listed on the DLC website: designlights.org/QPL
2. Enter the product I.D. for that equipment in the appropriate field on the prescriptive worksheet and/or enter it in the "After Retrofit" field on the custom worksheet for each installed item.
3. If lighting being used in a project does not fall within a category listed by the DLC and meets DLC performance criteria, the applicant must use this form to have the equipment evaluated for incentive award.

- You must complete this form for each equipment type and submit it with your reservation application.

4. Lighting that fails to meet DLC performance criteria is ineligible for DTE incentives.

These LED products are not eligible for incentives through the Energy Efficiency Program for Business:

- Screw-in LED products
- Any products that receive an incentive through the DTE Lighting Instant Discount Program (dteenergy.com/savenow)

The following information is required to review LED products that do not fall into a DLC category, but may meet our Program criteria and be eligible for incentives:

Product manufacturer: _____

Specific model number being used: _____

Explanation for installing this specific product: _____

Technical documentation required (attach to your reservation application, along with this form):

- Specification sheet
- Warranty terms and conditions (if not included on the specification sheet)
- IES-LM-79-08 testing report from an accredited laboratory (see DLC website for more information)
- UL/CUL/ETL certification

Note: You may be required to submit photometry for certain products. DTE reserves the right to deny an application for incentives based on product reference data.
