

2021 Prescriptive deemed measure worksheet

This worksheet lists all of the requested deemed measures that are not on our main program application. Once you have requested a new measure, it will be reviewed and approved by our engineers, and then added to this list. Complete this worksheet and attach to your application.

Certain prescriptive measures require a reservation application. See individual specifications for more information.

Unitary and Split AC

Equipment type	Unit
Unitary and Split AC	Ton

HE-3 to HE-5 – Unitary and Split Air Conditioning Systems

Incentives are available to install replacement air conditioning systems that meet or exceed qualifying cooling efficiency. They can be either split systems or single packaged units. Water-cooled systems, evaporative coolers and water source heat pumps are not eligible for this incentive, but may be eligible for a custom incentive. Split system efficiency must be for air handling and condensing unit combined.

Deemed electric measures

Ref #	Equipment type	Incentive	Unit	# of units	Total incentive
 HE-3	AC 65k - 135k EER 12 IEER 13.8	\$3.00/unit	Ton		
 HE-4	AC 135k - 240k EER 12 IEER 13	\$2.00/unit	Ton		
 HE-5	AC 240k - 760k EER 10.6 IEER 13.3	\$7.00/unit	Ton
