

Welcome to the 2019 Program Year

Highlights

The 2019 Program Year features a few changes in measure specifications and incentive levels, as well as, major changes to the Program Application.

Measure & Incentive Changes

DTE Energy Efficiency Program for Business will continue to use the higher wattages for T12 fixtures if the upgraded lights are A) New fixtures, or B) Retrofit kits, per DLC main categorization.

Newly added, is the Networked Lighting Controls section if you are installing both Networked Lighting Controls and upgrading lights. These incentives will be paid at a higher rate than a lighting upgrade without Networked Lighting Controls. Incentives also come in two tiers, depending on how extensive the application of your system is.

The incentive rate for Lighting Power Density for lights on 24/7 in parking garages (LO-18) increased from \$145/kW reduced to \$400/kW reduced.

The Compressed air storage tank now has two levels of incentive. If you are installing a compressed air storage tank, you are eligible, even if only upgrading to ≥ 3 gallons per CFM of trim compressor capacity via CA-42. If you are upgrading to ≥ 5 gallons per CFM of trim compressor capacity, then you are still eligible for CA-32 as you were previously.

Due to the adoption of a new version of code (ASHRAE Standard 90.1 v 2007 \rightarrow 2013), roughly half of the least efficient chiller measures have been removed from the Application. ENERGY STAR® fixtures are now accepted across all of the lighting upgrade measures.

Application Upgrades & Process Changes

The total number of pages in the Program Application have been reduced from 48 to 19, thanks to feedback from customer/contractors.

Drop-down menus have been added for chillers and Lighting Power Density, for extra ease of use.

The required tune-up information for boilers, furnaces, and chillers are now in a separate addendum (previously in the application)

The LEED New Construction section of the Application is now a stand-alone Application.

The Agriculture section of the Application is also now a stand-alone Application.

Bonus Offers

Michigan Saves is offering the following financing options:

- 1.99% for all electric customer projects up to \$50,000 for 24 months
- 2.99% for all electric customer projects up to \$150,000 for 60 months
- 0% for all gas customer projects up to \$300,000 for 60 months
- 0% for all k-12 schools and houses of worship up to \$150,000 for 60 months
- 1.99% for all government, municipal and streetlight customers up to \$150,000 for 60 months
- 0% for all Food Service Instant Rebate projects up to \$50,000 for 36 months (minimum project size of \$2,500)

Project GreenLight Detroit has a bonus of 35% that will now be calculated right on the application for qualifying projects.

2019 Important Dates

The 2019 Program Year application period:

Dec. 1, 2018 - Nov. 30, 2019

- No Reservations will be extended beyond Nov. 30, 2019.
- A project must be completed within 90 days of the Reservation date on your Reservation letter (if applicable).
- **Final Applications** must be submitted within 60 days of project completion or Nov. 30, whichever comes first.
- Incomplete **Final Applications** may be subject to cancellation.
- Any **Application** submitted after Nov. 30 may be cancelled.
