

# Energy Efficiency Program for Business

## Welcome to the 2020 program year!

### Highlights

The 2020 program year features a few changes in measure specifications and incentive levels, as well as, changes to the Michigan Saves terms.

#### Measure & incentive changes

In 2020, chiller measures (CH-200 through CH-227) have been reworked, making it easier to qualify. We have added a [new chiller addendum](#), that will assist you in filling out the application. We have also added a new measure for chiller plant optimization (HE-57). This new measure provides incentives for existing chiller plants that utilize controls to optimize system efficiency. Chiller tune-up measure (HE-50) incentive rate has been lowered.

Occupancy sensors and combination occupancy/daylight harvesting sensor measures have been broken into 3 categories: less than 150 sq. ft., 150-500 sq. ft., and greater than 500 sq. ft. of controlled space per sensor. Networked lighting controls tier two lighting incentives have been lowered (LO-20 through LO-29 and LO-40 through LO-45). A new measure (LO-52) has been added for tier 2 controls in the place of the additional incentive measures (LO-50 and LO-51).

VSD air compressor less than 50 HP and VSD air compressor 50-500 HP measures have been broken into 2 categories: 2,000-6,000 hours of use and greater than 6,000 hours of use. Incentives for these measures have been adjusted accordingly.
